

DISINFECTION AND SANITIZATION SOLUTIONS 101

Section 1: We Are What They Say We Are

Before any antimicrobial product can be sold in the US, it must successfully complete the EPA's Registration process and be issued a "Master Label." The Master Label includes product use directions, precautionary statements, first aid information, approved uses and other product information, including approved product performance claims.

No matter what you read or hear about an antimicrobial product, it's only true if it also appears on the Master Label.
